SCIENTIFICALLY FORMULATED AND RESEARCH BACKED MILK REPLACERS.

MAPLEVIEW PRECISION START + DECCOX (26-22-24)

## MAPLEVIEW PRECISION START + DECCOX (26-22-24)

Mapleview Precision Start is designed to provide stage-specific nutrition for the first three weeks of life, during the critical period when calves require energy, protein and a nutrient-dense formulation to support early growth, immune function, and digestive development. It also offers immune support through immunoglobulins (IgG) and naturally occurring Lactoferrin for enhanced gut health, pathogen defense, and improved nutrient absorption in the critical early weeks of life when susceptible to disease challenges. Feeding Precision Start for three weeks, followed by a high-quality milk replacer until weaning, ensures calves receive stage-specific nutrition, setting the foundation for higher production and long-term health.

### Guaranteed Analysis

**Crude Protein (min) - 26%**

**Milk Protein (min) - 22%**

**Crude Fat (min) - 24%**

**Crude Fibre (max) - 0.15%**

### Vitamins and Minerals

**Vitamin A (min) - 44 000 IU/kg**

**Vitamin D (min) - 7 500 IU/kg**

**Vitamin E (min) - 275 IU/kg**

**Calcium (actual) - 0.95%**

**Phosphorus (actual) - 0.70%**

**Sodium (actual) - 0.55%**
