

BALANCER FP25 + DECCOX-M®

FUTURE PERFORMANCE
STARTS **TODAY**

Balancer FP25 + Deccox-M® is a concentrated nutritional fortifier designed to be fed alongside whole milk. It allows producers to continue feeding 75% whole milk while delivering a targeted blend of functional proteins, additives, amino acids, minerals and vitamins to improve calf performance, gut health and feeding consistency.

SUPPORT GUT HEALTH

Functional proteins and advanced additives support intestinal integrity and immune function.

MAXIMIZE PERFORMANCE

Balanced amino acids, minerals and vitamins help drive growth, efficiency and overall calf performance.

FEEDING AND MIXING RATE (PER LITRE OF FINAL SOLUTION)

STEP 1:

WEIGH **35 G** OF BALANCER
FP25 POWDER.

+

STEP 2:

ADD **215 ML** OF HOT WATER AND MIX
IN THE **35 G** OF BALANCER FP25.

+

STEP 3:

MEASURE **750 ML** OF WHOLE MILK AND MIX
INTO THE **250 ML** OF BALANCER SOLUTION.

= 1 LITRE OF FINAL SOLUTION

CRUDE PROTEIN	26%
FAT	6%
FUNCTIONAL PROTEIN	Provides 5% functional protein including IgG, bioactive compounds and amino acid-rich protein
KEY AMINO ACIDS	Balanced Lysine and Methionine
MINERALS	Provides additional organic (chelated) mineral sources
VITAMINS	Provides necessary vitamin fortification

ADDITIVES & FUNCTIONAL DELIVERY

The **Balancer** is formulated with specific additives and functional proteins to ensure that, when mixed with whole milk, each component is delivered at its intended and approved label rate.

Deccox-M®

Deccox helps prevent coccidiosis, supporting gut health and consistent growth in calves.

Celmax™

Celmax helps improve feed efficiency and overall gut health by binding to potential pathogens.

NutraPro Functional Protein

Functional protein provides IgG, bioactive compounds, as well as easily digestible protein to support gut health and overall calf performance.

SUPPORTS STARTER GRAIN INTAKE & RUMEN DEVELOPMENT

Whole milk contains elevated fat levels that can result in early satiety leading to suppressed starter grain intake, and delaying rumen development.

WHOLE MILK

WITH BALANCER FP25

BALANCES THE LIQUID DIET.

FINAL LIQUID DIET

**IMPROVED BALANCE.
BETTER RESULTS.**

Provides a balanced liquid diet

Encourages earlier starter grain intake by balancing fat levels

Supports rumen development

Helps build a strong foundation for long-term productivity

Delivery of functional additives and proteins

Acts as a carrier for targeted technologies not present in whole milk supporting gut health, immunity, and overall performance.

Better performance outcomes

Healthier calves today.
More productive animals tomorrow.

Future performance starts *today*
